

# E-Bus Management Based Current Location System

## Wireframe Documentation

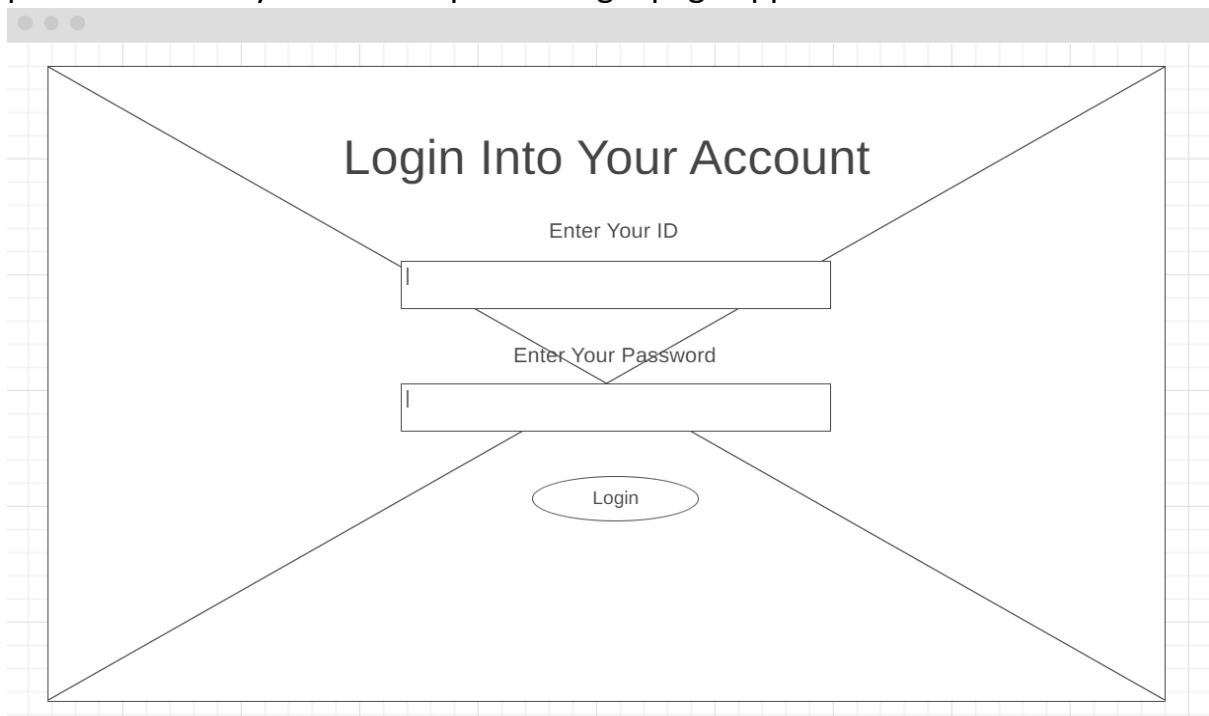

# Homepage

The first page that appears when a person visits the website will be as below

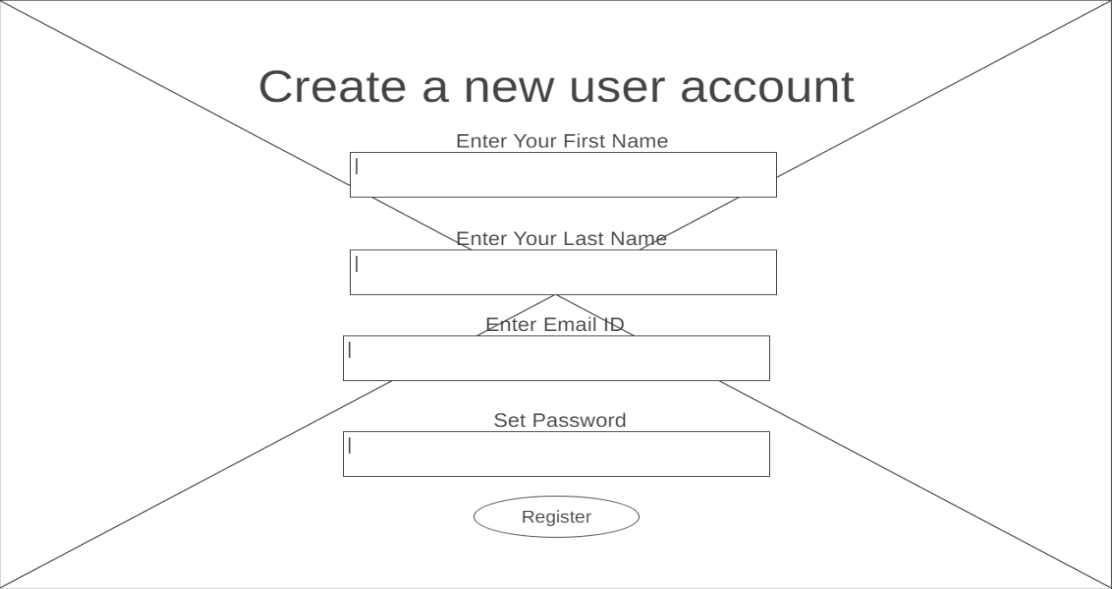

# Login Pages

Here there are three modes available and they are admin, user, driver. When a person chose any one the respective login page appears

## Registration Page

And if the person is a new user, then he/she may go for registration and the following response is made available for the person

A wireframe of a registration page titled "Create a new user account". The form is centered and contains the following elements: a title "Create a new user account", a label "Enter Your First Name" above a text input field, a label "Enter Your Last Name" above a text input field, a label "Enter Email ID" above a text input field, a label "Set Password" above a text input field, an oval "Register" button, and a "Logout" button at the bottom. The entire form is enclosed in a rectangular frame with a grid background.

Create a new user account

Enter Your First Name

Enter Your Last Name

Enter Email ID

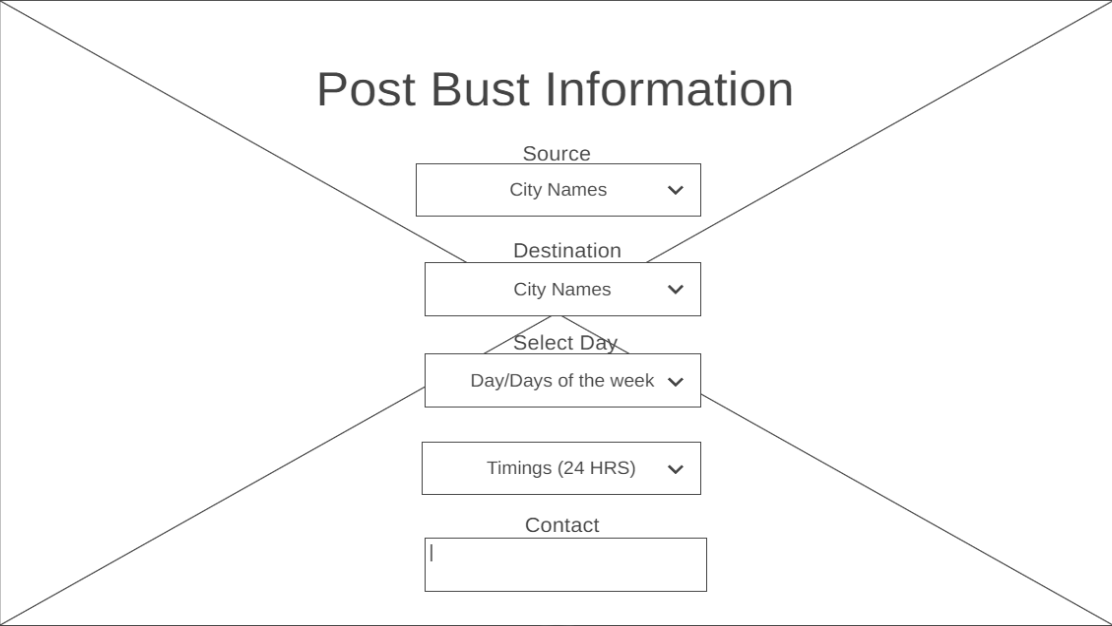

Set Password

Register

Logout

## Driver Page

And if the person is Driver and signed in successfully then he will be able to access the below functionality of posting bus information

A wireframe of a driver page titled "Post Bust Information". The form is centered and contains the following elements: a title "Post Bust Information", a "Source" dropdown menu with "City Names" selected, a "Destination" dropdown menu with "City Names" selected, a "Select Day" dropdown menu with "Day/Days of the week" selected, a "Timings (24 HRS)" dropdown menu, a "Contact" text input field, an oval "Post Info" button, and a "Logout" button at the bottom. The entire form is enclosed in a rectangular frame with a grid background.

## User Page

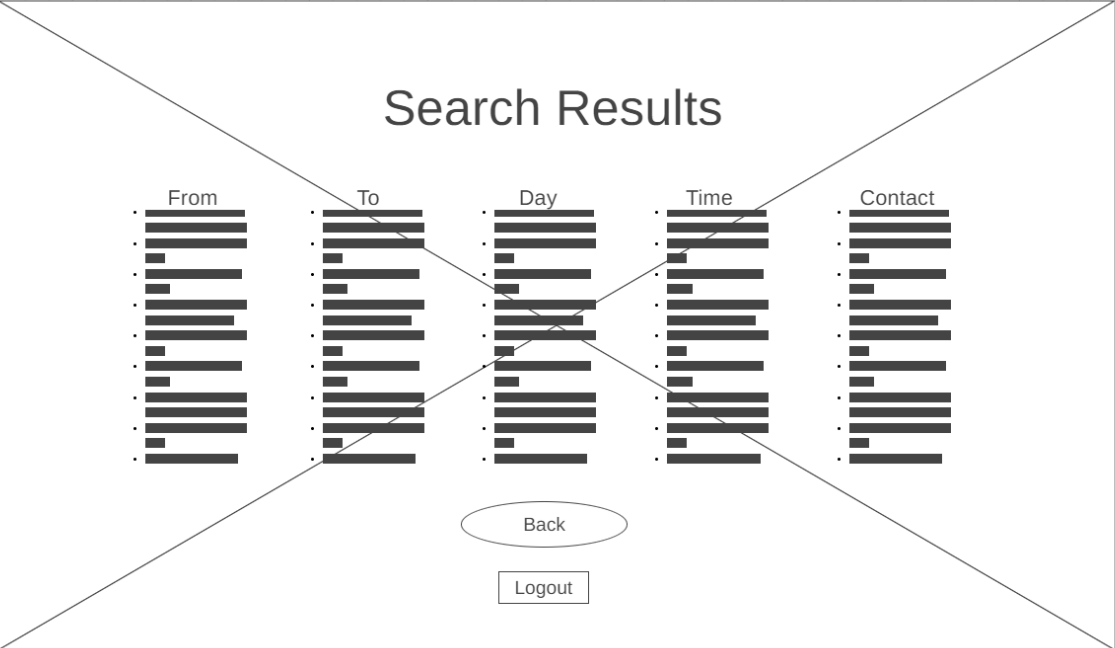

And if the person is user, then he/she can log in and search info related to buses between source the destination

The image shows a web browser window with a search form titled "Search Bus". The form contains two dropdown menus, both labeled "City Names" with a downward arrow. The first dropdown is labeled "Source" and the second is labeled "Destination". Below the dropdowns is an oval button labeled "Search" and a rectangular button labeled "Logout".

## Bus Information Page

A sample response for the above search result is as shown below

The image shows a web browser window displaying search results titled "Search Results". The results are presented in a table with five columns: "From", "To", "Day", "Time", and "Contact". Each column contains a list of data entries, represented by horizontal bars. Below the table is an oval button labeled "Back" and a rectangular button labeled "Logout".
